FINAL EXAM JUNE 2012

NATIONAL BOARD OF EXAMINATIONS

OTORHINOLARYNGOLOGY

PAPER- I

Time: 3 hours Max. Marks : 100 ENT/J/12/28/I

Attempt all questions in order. Each question carries 10 marks.

1.	Enumerate various radiosurgery techniques. Outline their principles and	4+6
	uses.	
2.	Define angioneurotic oedema. Classify and give brief account of each.	2+5+3
	How would you manage it?	
3.	Define radio-sensitizers. Enumerate them with their mode of action.	3+7
4.	What is MRSA? What are hospital safety measures for its prevention?	2+5+3
	What is its management in a patient?	
5.	What is robotic surgery? Describe its principles and uses in ENT.	4+4+2
6.	Define AIDS. What are the modes of its transmission? Enumerate	1+2+7
	measures for post exposure management particularly in medical	
	personnel.	
7.	What are the mechanisms of fracture of mandible? Give its clinical	3+(2+2+3)
	features, specific investigations and management.	
8.	Enumerate causes of stridor in a 2 year old child. How would you	4+6
	manage pharyngo-laryngeal diphtheria?	
9.	What is 'gene therapy'? Discuss its role in ENT.	2+8
10.	What is acid-base balance & its basics? How will you manage a	(2+2)+6
	suspected case of respiratory acidosis?	

FINAL EXAM JUNE 2012

NATIONAL BOARD OF EXAMINATIONS

OTORHINOLARYNGOLOGY PAPER- II

Time : 3 hours Max. Marks : 100

ENT/J/12/28/II

Attempt all questions in order.

Each question carries 10 marks.		
1.	What is the protocol for assessment of suspected hearing impaired	6+2+2
	infant? Outline options with advantages and drawbacks for the	
	management of a hearing impaired school going child.	
2.	Enumerate causes of odynophagia. Outline management of a patient	6+4
	with stage II oropharyngeal malignancy.	
3.	Enumerate causes of proptosis related to ENT. Outline investigations	5+5
	and management of such a case due to nasopharyngeal angiofibroma.	
4.	Define noise induced hearing loss. Briefly outline its pathogenesis and	2+4+4
	current guidelines for preventing noise pollution and related hearing	
	impairment.	
5.	Define vasomotor rhinitis. What are its diagnostic steps and	3+4+3
	management?	
6.	What is laryngo-pharyngeal reflux? Outline its investigative protocol and	2+4+4
	management.	
7.	Briefly describe significance of Reinke's space, preepiglottic and	3+3+4
	paraglottic space in spread of laryngeal cancer.	
8.	Describe briefly pathogenesis, clinical features and management of	4+2+4
	lethal midline granuloma.	
9.	Classify temporal bone fractures, their clinical manifestations and	2+5+3
	management.	
10.	Classify thryoiditis. Outline descriptively pathogenesis of Hashimoto's	2+4+4
	disease and management.	

FINAL EXAM JUNE 2012

NATIONAL BOARD OF EXAMINATIONS

OTORHINOLARYNGOLOGY PAPER- III

ENT/J/12/28/III Time : 3 hours Max. Marks: 100 Attempt all questions in order. Each question carries 10 marks. 1. Discuss briefly principles and complications of supraomohyoid neck 6+4 dissection. 2. Discuss briefly anterior cricoid split, cricotracheal resection and 2+4+4 laryngotracheal reconstruction in subglottic stenosis. 4+6 3. Describe branchial arch fistulae and sinuses. Discuss their management. 4. Describe briefly etiopathogenesis and role of surgical options for 4+4+2 atrophic rhinitis. Add a role on Slavic facies. 5. Describe the pathogenesis of acquired cholesteatoma and its 3+4+3 mechanism in bone resorption. 6. What are middle ear implants? Briefly describe their mechanism, 3+(3+2+2) indications and limitations. 7. Describe briefly velopharyngeal insufficiency and its surgical 4+6 management. 8. Describe pathophysiology of obstructive sleep apnoea and Epsworth 6+4 Sleepiness Scale. 9. Outline pre-surgical evaluation for rhinoplasty. Briefly describe various 3+(4+3)techniques and their complications. Describe briefly aetiology, diagnosis and management options for 10. 2+4+4 relapsing polychondritis.

NATIONAL BOARD OF EXAMINATIONS

OTORHINOLARYNGOLOGY PAPER- IV

: 3 hours Time ENT/J/12/28/IV Max. Marks : 100 Attempt all questions in order. Each question carries 10 marks. What are the elements of nasal secretions? Describe the composition 3+7of mucus. Describe anatomy of jugular foramen. What are the diseases which 5+5 2. affect it? 3. Enumerate vestibular function tests performed in evaluating vertigo. 4+3+3 Describe the 'Head Thrust Test' and its importance. 4. Describe the anatomy of infratemporal fossa and its surgical 5+5 approaches. 5. Describe the anatomy of lateral wall of nose. What are the principles of 6+4 Functional Endoscopic Sinus Surgery? 6. Describe the physiology of deglutition. 10 7. What is Riolan's bouquet? Enumerate the tumors originating in the 2+3+5 parapharyngeal space and describe the approaches to this space. Describe Hypothalamic-Pituitary-Thyroid complex for regulation of 10 Thyroid function. 9. Enumerate the branches of each division of Trigeminal nerve and the (4+3)+3structures they innervate. Describe briefly corneal reflex. 10. What are the theories of olfaction? What are primary odours, 4+(2+1+1)+2 presbyosmia and cacosmia? What is electronic nose?
