PATHOLOGY PAPER – I

PATH/J/15/32/I

Time : 3 hours Max. Marks : 100 Important instructions:

- Attempt all questions in order.
- Each question carries 10 marks.
- Read the question carefully and answer to the point neatly and legibly.
- Do not leave any blank pages between two answers.
- Indicate the question number correctly for the answer in the margin space.
- Answer all the parts of a single question together.
- Start the answer to a question on a fresh page or leave adequate space between two answers.
- Draw table/diagrams/flowcharts wherever appropriate.

Write short notes on:

 2. a) Primary Immunodeficiency Syndromes. b) Functional disorders of leukocytes. 3. a) Pathophysiology of ageing. b) Pathogenesis of Type I diabetes mellitus. 4. Etiopathogenesis, morphology and fate of thrombus. 5. a) Circulating DNA in diagnosis of malignancies. b) Differential diagnosis of noncaseous necrotizing granulomatous diseases along with their laboratory diagnosis. 6. a) Role of automation in cytology. b) Principle and applications of fluorescent microscope. 7. a) Genomic Imprinting. b) Mechanism of acute renal transplant rejection. 8. a) Clinical features and various karyotypes found in Turner's syndrome. b) Pathological effects of free radicals. 9. a) Role of immunofluorescence in diagnosis of bullous lesions of skin. b) Investigations in a case of malabsorption syndrome. 	5+3+2	a) Etiopathogenesis of Sudden Infant Death Syndrome.b) Role of angiogenesis in tumour spread.c) What are activators and inhibitors of angiogenesis?	1.
b) Pathogenesis of Type I diabetes mellitus. 4. Etiopathogenesis, morphology and fate of thrombus. 5. a) Circulating DNA in diagnosis of malignancies. b) Differential diagnosis of noncaseous necrotizing granulomatous diseases along with their laboratory diagnosis. 6. a) Role of automation in cytology. b) Principle and applications of fluorescent microscope. 7. a) Genomic Imprinting. b) Mechanism of acute renal transplant rejection. 8. a) Clinical features and various karyotypes found in Turner's syndrome. b) Pathological effects of free radicals. 9. a) Role of immunofluorescence in diagnosis of bullous lesions of skin.	5+5		2.
