### Message

Modern medical science is changing fast in leaps and bounds. It is a challenge to keep pace with the changing trends and abundance of knowledge. It is an endeavour of the NBEMS to ensure that good quality and high standard hospitals across the country are accredited to provide Post Graduate and Post-Doctoral training to students. NBEMS is also committed to increase the PG seats year on year and launch new courses.

NBEMS has started broad specialty programme at district and sub-district levels. At the same time, NBEMS has taken initiative to train even international students in sub-specialty fellowship programme.

NBEMS ensures that the admission to all its courses is done only through centralized merit-based counselling and the new course fee for the candidates is kept affordable.

Towards our student friendly approach, NBEMS has launched a communication portal for trainees which will provide a single platform to get their queries addressed. Keeping in pace with the changing demands, NBEMS has converted majority of its processes online.

NBEMS has taken up the challenge of providing teaching material to its trainees and have extended its webinar programs and I feel proud to say that more than 2000 lectures/presentations have been conducted through e-platform in last two years.

I extend my best wishes to our trainees, faculty and stakeholders. Your contribution to humanity deserves highest recognition.

Yours sincerely

*Abhijat Sheth*
